Synopsis

Joseph Wilson was born in Dumbarton, Dunbartonshire, and worked as a coal miner before enlisting in The Royal Scots at Edinburgh on 8 August 1914. He was recorded as 18 years and 33 days old, 5 feet 4 inches tall and weighing 115 pounds. His chest measurement was 36 inches, with two inches of expansion. A scar on his left forearm was noted, but he was accepted in medical category A1 and joined the regiment as Private 3019.

His disability statement records home service from 8 August 1914 until 14 March 1915, service in France from 14 March to 25 November 1915, and service at Salonica from 25 November 1915 until 22 December 1918. The active-service casualty form records embarkation from Marseilles on 27 November 1915 and disembarkation at Salonica on 3 December. It also records periods of leave, hospital admission and movement through convalescent depots during 1918.

Wilson stated that malaria began on 12 June 1917 and attributed it to climatic conditions. He received treatment at the 60th General Hospital and another hospital recorded as the 80th, both at Salonica. Later casualty entries include influenza and further hospital or convalescent-depot movements. He was eventually attached to the Malaria Concentration Centre at Berwick-on-Tweed.

At his medical examination in Glasgow on 27 February 1919, the examining officer recorded Wilson's account of recurrent malaria attacks but found no current clinical signs. The disability was assessed at less than 20 per cent. He was transferred to the Army Reserve on demobilisation on 29 March 1919, giving his home address as 2 Beaumont Place, Edinburgh.

OPINION OF THE EXAMINING MEDICAL OFFICER.
(i) Clear and definite answers to the following questions are to be carefully filled in by the Examining Medical Officer, as it is essential that the Minister of Pensions should be in possession of the most reliable information to enable him to decide upon the applicant's claim to pension.
Expressions such as "may," "might," "possibly," &c., should be avoided.
(ii) The rates of pension vary according to whether the disability is (a) caused or aggravated by service in the present war, (b) due to causes not connected with the present war, viz.: (1) previous active service, (2) climatic diseases in pre-war service, (3) ordinary military service before the war. This is therefore essential when assigning the causes of a disability to differentiate between them.
(iii) When there is more than one disability the replies will distinguish between them.

9. Give Diagnosis and particulars of:—
(a) Each disability claimed or discovered. *Malaria*
The man states that he had a relapse at Stirling in 1918 lasting a day. He feels good now. No other ailments. Anemia neg.
(b) The present condition thereof.

10. State whether each disability is:—
(a) Service during the present war.
(b) Previous active service.
(c) Climate in pre-war service.
(d) Ordinary military service before the war.
(e) Serious negligence or misconduct on the part of the claimant.
Give details:—

11. (a) Is each disability in a final stationary condition?
(b) If not, is re-examination before the expiration of the period of twelve months specially advised?

12. (a) What is the degree of disablement at which in your opinion he should be assessed at present?
Degrees of disablement should be expressed in words in the following percentages: 100, 80, 70, 60, 50, 40, 30, 20, less than 20, or nil.
(b) In case of aggravation, what in your opinion was the degree of disablement which existed before joining the Army?

Examining Medical Officer's Signature *M. MacLennan* Rank *Cap. R.A.M.C.*
Unit to which attached. *Ordnance Dept. Stirling*
